

SLA – Operational Requests

SLA	Client Relations Officer (CRO)
30 minutes	Register the request in the system and forward it to the responsible policy Admin.
1 hour	Send the initial response to the client (acknowledgment + any missing requirements).
1 business day	Follow up or escalate the request if not processed.
Documentation	All responses and follow-ups must be recorded in the system.

SLA	Policy Administration (Policy Admin)
30 minutes	Acknowledge receipt of the request forwarded by the CRO and log it in the system.
1 business day	Process the request (issuance/modification/cancellation) or raise remarks if incomplete.
3 business day	Maximum timeline to receive and process quotations from insurance companies (if applicable).
Documentation	All processing steps must be documented in the system.

Escalation Mechanism – Requests
Stage 1 – CRO Follow-up
If the responsible department does not respond within the SLA (30 minutes / 1 business day), the Client Relations Officer (CRO) follows up directly.
Stage 2 – Escalation to Supervisor
- If the delay continues, the case is escalated automatically by the system to the Supervisor (Policy Admin Supervisor or CRO Supervisor). - The system sends a notification email to the Supervisor.
Stage 3 – Escalation to COO
- If the request is still not resolved, it is escalated automatically by the system to the Chief Operations Officer (COO). - A system notification email is sent to the COO for immediate action.
4. Escalation
- If the COO does not take action or the case remains unresolved, it is escalated automatically by the system to the Quality & Development Management (Q&D). - Q&D receives a system notification email and reviews, documents, and requests urgent resolution.
Stage 5 – Final Escalation to Managing Director
- If the case is still unresolved after Q&D intervention, the system escalates automatically to the Managing Director (MD). - The MD receives a system notification email for direct intervention and final decision.
